PROFESSIONAL SUMMARY

AI Engineer and Data Scientist with 20+ years in enterprise software and 5+ years in applied machine learning. Experienced in NLP, LLM-powered systems, and production AI deployment. Previously delivered machine learning solutions at SAP including NER-based anonymization and predictive analytics. Current PhD research focuses on neuro-symbolic AI and Graph Neural Networks for automated verification of Islamic financial instruments. Operating at the intersection of AI engineering, financial compliance, and quantitative research.

AI IMPACT

- Built and deployed an NLP anonymization system at SAP processing millions of enterprise knowledge entries with 89% NER accuracy, integrated into production content pipeline.
- Developed machine learning models for system outage prediction and metric forecasting, enabling proactive monitoring of enterprise SAP infrastructure.
- Architecting a neuro-symbolic AI system using Graph Neural Networks + LLM pipelines for automated verification of Islamic financial instruments (ongoing PhD research at INCEIF).

RESEARCH INTERESTS

- Neuro-Symbolic AI
- Graph Neural Networks
- Financial AI & Computational Finance
- AI for Regulatory Compliance
- LLM-based Knowledge Graphs
- Multi-Agent AI Systems

RESEARCH & AI PROJECTS

Sukuk Integrity Verification Framework — PhD Research, INCEIF University

- Designing a neuro-symbolic AI system combining Graph Neural Networks with symbolic reasoning to verify structural compliance of sukuk financial instruments.
- Engineering LLM-to-graph pipelines to transform unstructured prospectuses into heterogeneous financial knowledge graphs with a 12-risk taxonomy across 6 categories.
- Building dual GNN architecture (GNN-raw & GNN-augmented) with adversarial stress testing on 200–350 real-world Malaysian sukuk documents.

NLP Anonymization System — SAP – Production Deployment

- Designed and deployed an NER-based anonymization system for SAP Community Network processing millions of Q&A entries with 89% accuracy.
- Evaluated 15+ ML/DL model configurations (CRF, BiLSTM, Word2Vec, GloVe); deployed CRF model integrated into SAP content pipeline.

Predictive Analytics for IT Operations — SAP Solution Manager

- Built system outage prediction and time-series metric forecasting models using HANA PAL/APL for proactive enterprise infrastructure management.

PROFESSIONAL EXPERIENCE

Data Scientist – Community Network Team

[SAP](#) | Dubai, UAE

May 2019 – Dec 2019

- Designed and deployed NLP-based anonymization pipelines integrating NER, POS tagging, and dependency parsing, improving privacy compliance across SAP knowledge platforms.
- Generalized the framework across diverse IT-domain text corpora. Applied CRISP-DM methodology end-to-end from data collection through production deployment.

Data Scientist – Solution Manager Product Team

May 2017 – Dec 2017

SAP | Dubai, UAE

- Built ML models for system outage prediction and metric forecasting using SAP HANA PAL/APL, enabling proactive infrastructure monitoring for enterprise clients.
- Led team education on CRISP-DM best practices; developed data transformation pipelines using HANA calculation views.

Senior Developer & CDS/HANA Data Modeler

Sep 2012 – Sep 2023

SAP – Globalization Services | Dubai, UAE

- Architected CDS views and HANA calculation views for Advanced Compliance Reporting on SAP S/4HANA and SAP Localization Hub.
- Led financial localization for MENA region (KSA, Egypt, Kuwait, Qatar, Oman): Zakat declaration, VAT, and withholding tax solutions.
- 11 years of enterprise-scale SAP ABAP and HANA development across S/4HANA Cloud and On-Premise.

SAP Consultant (Senior ABAP Developer)

Mar 2010 – Sep 2012

IBM | Egypt / Saudi Arabia

- Senior ABAP Developer for King Abdulaziz University and Saudi Arabian Airlines SAP ERP implementations.

System Analyst

2004 – 2011

Al Jehat Company | Dammam, Saudi Arabia

- System analyst for a 700+ employee professional services firm in surveying, IT, training, and manpower supply.

EDUCATION

PhD Candidate – Computational Finance & AI

2025 – Present

INCEIF University | Kuala Lumpur, Malaysia

- Neuro-symbolic AI framework combining GNNs with symbolic reasoning for computational verification of Shariah-compliant financial instruments.

MSc Data Science

2020

Heriot-Watt University | Dubai, UAE

- Thesis: Named Entity Recognition for IT-domain text anonymization. Deployed CRF model at 89% accuracy.

BSc Computer Science

2003

Cairo University – Faculty of Computers & Information | Cairo, Egypt

TECHNICAL SKILLS

Languages: Python, SQL, R, ABAP, Java, JavaScript, HANA SQL Script

LLM Engineering: RAG, Prompt Engineering, QLoRA / PEFT Fine-Tuning, Embeddings (OpenAI, Sentence Transformers), Hallucination Detection

Vector DBs & Eval: FAISS, Pinecone, ChromaDB; RAGAS, DeepEval, LangSmith, LangFuse

Data Pipelines: Airflow, ETL design, HANA calculation views, CRISP-DM methodology

AI Productivity Tools: Claude Code, GitHub Copilot, Cursor, ElevenLabs

ML Frameworks: PyTorch, TensorFlow, HuggingFace Transformers, spaCy, NLTK, scikit-learn

ML & NLP: Graph Neural Networks, Neuro-Symbolic AI, NER, Text Classification, Sequence Labeling, CRF, BiLSTM

AI Orchestration: LangChain, LangGraph, CrewAI, OpenAI Agents SDK, MCP, n8n

AI Infrastructure: Docker, Terraform, FastAPI, AWS (Bedrock, SageMaker, Lambda), GCP, Azure, GitHub Actions, CI/CD

AI ENGINEERING CAPABILITIES

- LLM system development (OpenAI, Anthropic, Gemini) with RAG pipelines using vector databases (FAISS, Pinecone, ChromaDB), embedding models (Sentence Transformers), QLoRA fine-tuning, and LLM evaluation frameworks (RAGAS, DeepEval).
- Multi-agent AI systems using LangGraph and CrewAI with tool-calling architectures via OpenAI Agents SDK and MCP; workflow automation with n8n and voice agents.
- Production AI deployment on AWS, GCP, and Azure using Docker, FastAPI, Terraform, CI/CD pipelines, Airflow orchestration, and LangFuse / LangSmith observability at enterprise scale.

CERTIFICATIONS

- Executive Programme in Algorithmic Trading (EPAT) – QuantInsti
- SAP Certified Application Associate – SAP HANA Modeling 1.0
- SAP Certified Development Specialist – ABAP for SAP HANA
- SAP Development Consultant – ABAP Web AS 6.20
- Sun Certified Programmer for Java 2 Platform (SCJP)
- Oracle Certified Associate (OCA)
